Make an Arduino-Controlled Robot (Make: Projects)

Michael Margolis

Make an Arduino-Controlled Robot (Make: Projects) Michael Margolis

Building robots that sense and interact with their environment used to be tricky. Now, Arduino makes it easy. With this book and an Arduino microcontroller and software creation environment, you'll learn how to build and program a robot that can roam around, sense its environment, and perform a wide variety of tasks. All you to get started with the fun projects is a little programming experience and a keen interest in electronics.

Make a robot that obeys your every command—or runs on its own.

Maybe you're a teacher who wants to show students how to build devices that can move, sense, respond, and interact with the physical world. Or perhaps you're a hobbyist looking for a robot companion to make your world a little more futuristic. With *Make an Arduino Controlled Robot*, you'll learn how to build and customize smart robots on wheels.

You will:

- Explore robotics concepts like movement, obstacle detection, sensors, and remote control
- Use Arduino to build two- and four-wheeled robots
- Put your robot in motion with motor shields, servos, and DC motors
- Work with distance sensors, infrared reflectance sensors, and remote control receivers
- Understand how to program your robot to take on all kinds of real-world physical challenges

From reader reviews:

Lidia Hill:

Why don't make it to become your habit? Right now, try to prepare your time to do the important work, like looking for your favorite guide and reading a e-book. Beside you can solve your long lasting problem; you can add your knowledge by the guide entitled Make an Arduino-Controlled Robot (Make: Projects). Try to stumble through book Make an Arduino-Controlled Robot (Make: Projects) as your pal. It means that it can being your friend when you feel alone and beside associated with course make you smarter than ever. Yeah, it is very fortunated for you personally. The book makes you much more confidence because you can know everything by the book. So , we need to make new experience as well as knowledge with this book.

Ida Shroul:

The book Make an Arduino-Controlled Robot (Make: Projects) can give more knowledge and information about everything you want. So why must we leave a good thing like a book Make an Arduino-Controlled Robot (Make: Projects)? Several of you have a different opinion about e-book. But one aim in which book can give many facts for us. It is absolutely proper. Right now, try to closer along with your book. Knowledge or facts that you take for that, it is possible to give for each other; you can share all of these. Book Make an Arduino-Controlled Robot (Make: Projects) has simple shape but the truth is know: it has great and large function for you. You can appear the enormous world by wide open and read a publication. So it is very wonderful.

William Pak:

This Make an Arduino-Controlled Robot (Make: Projects) are generally reliable for you who want to be described as a successful person, why. The main reason of this Make an Arduino-Controlled Robot (Make: Projects) can be among the great books you must have is usually giving you more than just simple looking at food but feed a person with information that possibly will shock your earlier knowledge. This book is actually handy, you can bring it all over the place and whenever your conditions both in e-book and printed people. Beside that this Make an Arduino-Controlled Robot (Make: Projects) forcing you to have an enormous of experience like rich vocabulary, giving you trial of critical thinking that could it useful in your day action. So , let's have it appreciate reading.

Rose Bennett:

Your reading sixth sense will not betray you actually, why because this Make an Arduino-Controlled Robot (Make: Projects) book written by well-known writer whose to say well how to make book that can be understand by anyone who read the book. Written throughout good manner for you, still dripping wet every ideas and producing skill only for eliminate your personal hunger then you still uncertainty Make an Arduino-Controlled Robot (Make: Projects) as good book not merely by the cover but also from the content. This is one publication that can break don't judge book by its protect, so do you still needing a different sixth

sense to pick this!?! Oh come on your studying sixth sense already told you so why you have to listening to an additional sixth sense.
