An Introduction to Biology for Everyone William M. MacArthur

"Biology for Everyone" is a book that helps one learn the basics of biology in a new and interesting way, because it is written in a comfortable format that includes personal accounts from the author. The book begins with the study of life itself and covers important basics of biology. The next four sections follow the evolutionary path of life on earth, explaining important new features each step of the way. The last section covers physiology and ecology, with a special focus on humans. There are a total of 65 chapters plus an exhaustive index. The number of color figures tops 900! Many chapters include a cladogram of the creatures discussed. The work is written in Australian English.
