Java Foundation Classes in a Nutshell: A Desktop Quick Reference (In a Nutshell (O'Reilly)) David Flanagan

Java Foundation Classes in a Nutshell is an indispensable quick reference for Java programmers who are writing applications that use graphics or graphical user interfaces. The author of the bestselling *Java in a Nutshell* has written fast-paced introductions to the Java APIs that comprise the Java Foundation Classes (JFC), such as the Swing GUI components and Java 2D, so that you can start using these exciting new technologies right away. This book also includes O'Reilly's classic-style, quick-reference material for all of the classes in the *javax.swing* and *java.awt* packages and their numerous subpackages. This reference material covers all of the new JFC classes in the Java 2 platform, as well as the existing Java 1.1 AWT classes. Once you've learned about the JFC, you'll keep this book next to your keyboard for handy reference while you program. *Java Foundation Classes in a Nutshell* contains the following:

- An overview of the architecture of graphical user interfaces built with both the new Swing API and the older AWT
- An introduction to the important components and application services provided by the Swing API
- An comprehensive explanation of the features of the new Java 2D graphics API
- A complete quick reference for the graphics- and GUI-related classes in the Java 2 platform

This book is part of the two-volume set of quick references that every Java programmer needs. It is an essential companion to *Java in a Nutshell, 3rd Edition*, which covers the key nongraphical APIs in Java 1.2. A third volume, *Java Enterprise in a Nutshell*, focuses on the Java Enterprise APIs and is of interest to programmers working on server-side or enterprise Java applications.

From reader reviews:

Lawrence Elam:

Reading a reserve tends to be new life style with this era globalization. With reading you can get a lot of information that may give you benefit in your life. Having book everyone in this world may share their idea. Guides can also inspire a lot of people. Many author can inspire their own reader with their story or even their experience. Not only the storyplot that share in the guides. But also they write about advantage about something that you need example. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors nowadays always try to improve their ability in writing, they also doing some research before they write on their book. One of them is this Java Foundation Classes in a Nutshell: A Desktop Quick Reference (In a Nutshell (O'Reilly)).

Gertrude Knudsen:

Playing with family in a park, coming to see the coastal world or hanging out with good friends is thing that usually you could have done when you have spare time, subsequently why you don't try thing that really opposite from that. Just one activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love Java Foundation Classes in a Nutshell: A Desktop Quick Reference (In a Nutshell (O'Reilly)), you may enjoy both. It is excellent combination right, you still want to miss it? What kind of hang type is it? Oh can occur its mind hangout people. What? Still don't understand it, oh come on its called reading friends.

Carol Wells:

In this period of time globalization it is important to someone to obtain information. The information will make you to definitely understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of recommendations to get information example: internet, classifieds, book, and soon. You will see that now, a lot of publisher in which print many kinds of book. The book that recommended to your account is Java Foundation Classes in a Nutshell: A Desktop Quick Reference (In a Nutshell (O'Reilly)) this e-book consist a lot of the information of the condition of this world now. This particular book was represented just how can the world has grown up. The words styles that writer value to explain it is easy to understand. The particular writer made some research when he makes this book. That is why this book appropriate all of you.

Joan Munoz:

As a university student exactly feel bored to help reading. If their teacher expected them to go to the library in order to make summary for some publication, they are complained. Just tiny students that has reading's heart or real their interest. They just do what the educator want, like asked to go to the library. They go to there but nothing reading significantly. Any students feel that examining is not important, boring and also can't see colorful images on there. Yeah, it is for being complicated. Book is very important for yourself. As

we know that on this time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. So , this Java Foundation Classes in a Nutshell: A Desktop Quick Reference (In a Nutshell (O'Reilly)) can make you feel more interested to read.
