Policy That Works for Forests and People: Real Prospects for Governance and Livelihoods (The Earthscan Forest Library) James Mayers, Stephen Bass

Since its original publication by the International Institute for Environment and Development in 1999, Policy That Works for Forests and People has been recognised as the most authoritative study to date of policy processes that affect forests and people. Providing a thorough analysis of the issues, options and factors that determine different outcomes and bolstered by a major annex containing tools and tactics, the book offers clear and practical advice on how to formulate, manage and implement policies appropriate to different contexts. These are policies that result in real improvements in the governance, use and economic benefits that can flow from forests to those who depend upon them. This book is essential reading for policy-makers, forestry practitioners and academics and students in all areas of forest policy, management and governance.
