**Renal Pathophysiology: The Essentials** Helmut G. Rennke MD, Bradley M. Denker MD

This text offers medical students a case-based approach to learning mechanisms of renal disease. Each chapter covers a disease and begins with a patient case, followed by discussion of the pathophysiology of the disease. Issues of differential diagnosis and therapy are linked to pathophysiologic mechanisms. Short questions interspersed in the text require students to apply their knowledge, and detailed answers to the questions are given. This edition includes a full-color insert and an appendix of normal lab values.
