Digital Signal Processing using MATLAB (Activate Learning with these NEW titles from Engineering!) Robert J. Schilling, Sandra L Harris

Help your students focus on the development, implementation, and application of modern DSP techniques with DIGITAL SIGNAL PROCESSING USING MATLAB, 3E. Written using an engaging, informal style, this book inspires students to become actively involved in each topic discussed. Each chapter starts with a motivational section that includes practical examples students can solve using the techniques covered in the chapter. Every chapter concludes with a detailed case study example, a chapter summary with student learning outcomes, and a generous selection of homework problems cross-referenced to sections within the chapter. A comprehensive DSP Companion software accompanies this edition for you to use inside the classroom and your students to use outside of the classroom. The DSP Companion software operates with MATLAB and provides a plethora of options for class demonstrations and interactive student explorations of analysis and design concepts.
