## **Introduction to Programming Languages** Arvind Kumar Bansal

In programming courses, using the different syntax of multiple languages, such as C++, Java, PHP, and Python, for the same abstraction often confuses students new to computer science. **Introduction to Programming Languages** separates programming language concepts from the restraints of multiple language syntax by discussing the concepts at an abstract level.

Designed for a one-semester undergraduate course, this classroom-tested book teaches the principles of programming language design and implementation. It presents:

- Common features of programming languages at an abstract level rather than a comparative level
- The implementation model and behavior of programming paradigms at abstract levels so that students understand the power and limitations of programming paradigms
- Language constructs at a paradigm level
- A holistic view of programming language design and behavior

To make the book self-contained, the author introduces the necessary concepts of data structures and discrete structures from the perspective of programming language theory. The text covers classical topics, such as syntax and semantics, imperative programming, program structures, information exchange between subprograms, object-oriented programming, logic programming, and functional programming. It also explores newer topics, including dependency analysis, communicating sequential processes, concurrent programming constructs, web and multimedia programming, event-based programming, agent-based programming, synchronous languages, high-productivity programming on massive parallel computers, models for mobile computing, and much more. Along with problems and further reading in each chapter, the book includes in-depth examples and case studies using various languages that help students understand syntax in practical contexts.

### **From reader reviews:**

#### **Matthew Fry:**

The actual book Introduction to Programming Languages has a lot associated with on it. So when you make sure to read this book you can get a lot of benefit. The book was written by the very famous author. Mcdougal makes some research previous to write this book. This kind of book very easy to read you may get the point easily after reading this book.

#### **Eric Reynolds:**

In this period globalization it is important to someone to obtain information. The information will make someone to understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You can observe that now, a lot of publisher this print many kinds of book. The particular book that recommended to you is Introduction to Programming Languages this publication consist a lot of the information in the condition of this world now. This specific book was represented how do the world has grown up. The words styles that writer use to explain it is easy to understand. The actual writer made some study when he makes this book. That's why this book acceptable all of you.

#### **Kim Nielsen:**

Don't be worry in case you are afraid that this book will probably filled the space in your house, you could have it in e-book technique, more simple and reachable. This kind of Introduction to Programming Languages can give you a lot of friends because by you considering this one book you have thing that they don't and make a person more like an interesting person. This specific book can be one of a step for you to get success. This guide offer you information that might be your friend doesn't realize, by knowing more than various other make you to be great men and women. So , why hesitate? We need to have Introduction to Programming Languages.

#### **Margaret Ochoa:**

That book can make you to feel relax. This particular book Introduction to Programming Languages was bright colored and of course has pictures around. As we know that book Introduction to Programming Languages has many kinds or type. Start from kids until adolescents. For example Naruto or Private investigator Conan you can read and believe you are the character on there. Therefore not at all of book tend to be make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book for yourself and try to like reading that will.
