Neuroscience: Fundamentals for Rehabilitation, 3e Laurie Lundy-Ekman PhD PT

This practical guide focuses on the evidence-based neuroscience information that is most relevant to the practice of physical rehabilitation. It connects the theory of neuroscience with real-world clinical application with such features as: stories written by real people with neurological disorders, case studies, and lists summarizing key features of neurological disorders. It also provides clear descriptions of a complete range of neurological disorders and the body systems they affect. The text progresses logically from the molecular and cellular levels, to systems, and then to regions, to help make complex information easy to master. Special features such as Clinical Notes boxes with "at-a-glance" summaries, Red Flag boxes, and hundreds of full-color illustrations, enhance the learning experience and make it easy for the student and clinician to access clinically relevant information.

- Includes clear descriptions of a wide range of neurological disorders and the body system they affect to help make complex information easier to master and to provide the framework essential for understanding the nervous system
- Uses full-color clinical and gross photographs to clarify the spatial relationships among neural structures and show pathological neural changes
- A color atlas provides gross photographs and scans with accompanying diagrams that label key structures in the brain
- Numerous tables, flow charts, and boxes highlight essential concepts, processes, and relationships
- At-a-Glance Disorder boxes outline the pathology, etiology, signs and symptoms, and prognoses of the most common neurological disorders to provide a quick summary of the features of neurological disorders commonly encountered in clinical practice
- Clinical Notes at the end of the chapter sections provide relevant case studies with questions to demonstrate clinical applications of neuroscience knowledge and challenges the student to apply the information to clinical situations
- Review Questions at the end of each chapter help students focus on key subject matter from each chapter
- Actual patient stories set the scene for many chapters to help the student and clinician relate the scientific information to clinical reality
- A DVD with approximately 40 video clips and animations supports concepts in the text
- Chapter outlines at the beginning of each chapter succinctly define the chapter content
- Red Flags boxes highlight physical and psychological manifestations of neurological disorders
- Nearly 90 new illustrations have been added to reflect updated research and new topics

From reader reviews:

Anthony Chan:

The book Neuroscience: Fundamentals for Rehabilitation, 3e can give more knowledge and information about everything you want. So why must we leave the best thing like a book Neuroscience: Fundamentals for Rehabilitation, 3e? A number of you have a different opinion about reserve. But one aim which book can give many details for us. It is absolutely appropriate. Right now, try to closer with the book. Knowledge or data that you take for that, you can give for each other; it is possible to share all of these. Book Neuroscience: Fundamentals for Rehabilitation, 3e has simple shape but the truth is know: it has great and large function for you. You can appear the enormous world by open and read a book. So it is very wonderful.

Jennifer Carter:

Do you considered one of people who can't read satisfying if the sentence chained inside the straightway, hold on guys this kind of aren't like that. This Neuroscience: Fundamentals for Rehabilitation, 3e book is readable through you who hate those straight word style. You will find the facts here are arrange for enjoyable looking at experience without leaving actually decrease the knowledge that want to offer to you. The writer connected with Neuroscience: Fundamentals for Rehabilitation, 3e content conveys prospect easily to understand by lots of people. The printed and e-book are not different in the written content but it just different such as it. So , do you even now thinking Neuroscience: Fundamentals for Rehabilitation, 3e is not loveable to be your top list reading book?

Linda Haag:

As we know that book is essential thing to add our information for everything. By a book we can know everything you want. A book is a list of written, printed, illustrated or blank sheet. Every year seemed to be exactly added. This reserve Neuroscience: Fundamentals for Rehabilitation, 3e was filled concerning science. Spend your time to add your knowledge about your research competence. Some people has distinct feel when they reading the book. If you know how big good thing about a book, you can sense enjoy to read a reserve. In the modern era like today, many ways to get book that you just wanted.

Virginia Benoit:

A lot of book has printed but it is different. You can get it by internet on social media. You can choose the top book for you, science, comedian, novel, or whatever through searching from it. It is identified as of book Neuroscience: Fundamentals for Rehabilitation, 3e. You can include your knowledge by it. Without departing the printed book, it might add your knowledge and make you happier to read. It is most significant that, you must aware about publication. It can bring you from one location to other place.
