Construction and Analysis of Safe, Secure, and Interoperable Smart Devices: International Workshop, CASSIS 2004, Marseille, France, March 10-14, 2004, ... Computer Science / Security and Cryptology)

This volume contains a selection of refereed papers from participants of the workshop "Construction and Analysis of Safe, Secure and Interoperable Smart Devices" (CASSIS), held from the 10th to the 13th March 2004 in Marseille, France: <http://www-sop.inria.fr/everest/events/cassis04/> The workshop was organized by INRIA (Institut National de Recherche en Informatique et en Automatique), France and the University of the Mediterranean, Marseille, France. The workshop was attended by nearly 100 participants, who were invited for their contributions to relevant areas of computer science.

The aim of the workshop was to bring together experts from the smart devices industry and academic researchers, with a view to stimulate research on formal methods and security, and to encourage the smart device industry to adopt innovative solutions drawn from academic research. The next generation of smart devices holds the promise of providing the required infrastructure for the secure provision of multiple and personalized services. In order to deliver their promise, the smart device technology must however pursue the radical evolution that was initiated with the adoption of multi-application smartcards. Typical needs include: - The possibility for smart devices to feature extensible computational infrastructures that may be enhanced to support increasingly complex applications that may be installed post-issuance, and may require operating system functionalities that were not pre-installed. Such additional flexibility must however not compromise security. - The possibility for smart devices to achieve a better integration with larger computer systems, through improved connectivity, genericity, as well as interoperability.

From reader reviews:

Mildred Duncan:

In other case, little individuals like to read book Construction and Analysis of Safe, Secure, and Interoperable Smart Devices: International Workshop, CASSIS 2004, Marseille, France, March 10-14, 2004, ... Computer Science / Security and Cryptology). You can choose the best book if you appreciate reading a book. Provided that we know about how is important a new book Construction and Analysis of Safe, Secure, and Interoperable Smart Devices: International Workshop, CASSIS 2004, Marseille, France, March 10-14, 2004, ... Computer Science / Security and Cryptology). You can add knowledge and of course you can around the world by the book. Absolutely right, because from book you can learn everything! From your country right up until foreign or abroad you will be known. About simple point until wonderful thing you can know that. In this era, we could open a book as well as searching by internet system. It is called e-book. You need to use it when you feel fed up to go to the library. Let's learn.

Julia Jenkins:

The reserve with title Construction and Analysis of Safe, Secure, and Interoperable Smart Devices: International Workshop, CASSIS 2004, Marseille, France, March 10-14, 2004, ... Computer Science / Security and Cryptology) includes a lot of information that you can understand it. You can get a lot of profit after read this book. That book exist new understanding the information that exist in this reserve represented the condition of the world now. That is important to yo7u to be aware of how the improvement of the world. That book will bring you with new era of the the positive effect. You can read the e-book on your smart phone, so you can read the item anywhere you want.

Chad Foster:

In this era which is the greater man or who has ability in doing something more are more important than other. Do you want to become certainly one of it? It is just simple approach to have that. What you should do is just spending your time little but quite enough to possess a look at some books. One of the books in the top listing in your reading list is Construction and Analysis of Safe, Secure, and Interoperable Smart Devices: International Workshop, CASSIS 2004, Marseille, France, March 10-14, 2004, ... Computer Science / Security and Cryptology). This book that is certainly qualified as The Hungry Slopes can get you closer in growing to be precious person. By looking right up and review this e-book you can get many advantages.

Cheryl Lopez:

That e-book can make you to feel relax. This kind of book Construction and Analysis of Safe, Secure, and Interoperable Smart Devices: International Workshop, CASSIS 2004, Marseille, France, March 10-14, 2004, ... Computer Science / Security and Cryptology) was colorful and of course has pictures on the website. As we know that book Construction and Analysis of Safe, Secure, and Interoperable Smart Devices:

International Workshop, CASSIS 2004, Marseille, France, March 10-14, 2004, ... Computer Science / Security and Cryptology) has many kinds or genre. Start from kids until youngsters. For example Naruto or Investigation company Conan you can read and think you are the character on there. Therefore , not at all of book are make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book in your case and try to like reading that will.
