Biotechnology: Our Future as Human Beings and Citizens (SUNY series in Philosophy and Biology)

Considers the ethics and challenges of biotechnology.

An essential introduction to a controversial yet crucial field of research, *Biotechnology* surveys recent advances in the field and offers a wide range of opinions for and against expanding this new branch of science. Incisively examining such key topics as therapeutic cloning, genetic enhancement, stem cell therapy, and the use of psychotropic drugs such as Prozac and Ritalin, contributors to this volume agree that biotechnology will inevitably change human life. However, they debate the right way to balance the potential to cure disease and relieve human suffering with the need to respect life and preserve human dignity. Several explore the way major religions—both Eastern and Western—treat the subject. Others analyze the role of government in biotechnology and specific applications of the technology that should be practiced. Serving as an introduction to this ethically complicated and significant scientific movement, the book ultimately raises the broader, fundamental question of the meaning of human flourishing.

“The chapters present the insights of authors working in biology, ethics, history, philosophy, political science, religious studies, scientific journalism, and medicine. In this way, each affords a disciplinary vision and, when taken together, each and all contribute to the discourse (and debate) about whether biotechnology is the most current, shining attribute of our humanity, or a tool and trend that moves us farther from our nature.” — *Quarterly Review of Biology*

"...[a] stimulating book." — *CHOICE*

“There is no other book by such a wide spectrum of thinkers—Sutton offers us original articles with well-articulated alternative positions.” — Carl Mitcham, Colorado School of Mines

From reader reviews:

William Emmer:

The book *Biotechnology: Our Future as Human Beings and Citizens* (SUNY series in Philosophy and Biology) can give more knowledge and also the precise product information about everything you want. Why then must we leave the great thing like a book *Biotechnology: Our Future as Human Beings and Citizens* (SUNY series in Philosophy and Biology)? Several of you have a different opinion about publication. But one aim in which book can give many facts for us. It is absolutely suitable. Right now, try to closer together with your book. Knowledge or data that you take for that, you could give for each other; you may share all of these. Book *Biotechnology: Our Future as Human Beings and Citizens* (SUNY series in Philosophy and Biology) has simple shape but the truth is know: it has great and large function for you. You can seem the enormous world by available and read a e-book. So it is very wonderful.

Fred Miller:

Reading a book for being new life style in this calendar year; every people loves to learn a book. When you examine a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, since book has a lot of information upon it. The information that you will get depend on what forms of book that you have read. In order to get information about your research, you can read education books, but if you act like you want to entertain yourself read a fiction books, this kind of us novel, comics, and soon. The *Biotechnology: Our Future as Human Beings and Citizens* (SUNY series in Philosophy and Biology) provide you with a new experience in looking at a book.

Elizabeth Daugherty:

Is it an individual who having spare time after that spend it whole day by watching television programs or just resting on the bed? Do you need something new? This *Biotechnology: Our Future as Human Beings and Citizens* (SUNY series in Philosophy and Biology) can be the answer, oh how comes? A fresh book you know. You are so out of date, spending your time by reading in this fresh era is common not a geek activity. So what these books have than the others?

Jerry Blair:

As a college student exactly feel bored to reading. If their teacher requested them to go to the library or make summary for some e-book, they are complained. Just little students that has reading's internal or real their passion. They just do what the teacher want, like asked to the library. They go to there but nothing reading critically. Any students feel that examining is not important, boring as well as can't see colorful images on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this age, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this *Biotechnology: Our Future as Human Beings and Citizens* (SUNY series in Philosophy and Biology) can make you sense more interested to read.
