Surface Production Operations: Volume III: Facility Piping and Pipeline Systems Maurice Stewart

Surface Production Operations: Facility Piping and Pipeline Systems, Volume III is a hands-on manual for applying mechanical and physical principles to all phases of facility piping and pipeline system design, construction, and operation. For over twenty years this now classic series has taken the guesswork out of the design, selection, specification, installation, operation, testing, and trouble-shooting of surface production equipment.

The third volume presents readers with a "hands-on" manual for applying mechanical and physical principles to all phases of facility piping and pipeline system design, construction, and operation. Packed with charts, tables, and diagrams, this authoritative book provides practicing engineer and senior field personnel with a quick but rigorous exposition of piping and pipeline theory, fundamentals, and application.

Included is expert advice for determining phase states and their impact on the operating conditions of facility piping and pipeline systems; determining pressure drop and wall thickness; and optimizing line size for gas, liquid, and two-phase lines. Also included are a guide to applying international design codes and standards, and guidance on how to select the appropriate ANSI/API pressure-temperature ratings for pipe flanges, valves, and fittings.

- Covers new and existing piping systems including concepts for expansion, supports, manifolds, pigging, and insulation requirements
- Presents design principles for a pipeline pigging system
- Teaches how to detect, monitor, and control pipeline corrosion
- Reviews onshore and offshore safety and environmental practices
- Discusses how to evaluate mechanical integrity

From reader reviews:

Irene Vaughan:

Often the book Surface Production Operations: Volume III: Facility Piping and Pipeline Systems will bring one to the new experience of reading any book. The author style to describe the idea is very unique. When you try to find new book to study, this book very ideal to you. The book Surface Production Operations: Volume III: Facility Piping and Pipeline Systems is much recommended to you to read. You can also get the e-book through the official web site, so you can quicker to read the book.

Craig Baker:

The book Surface Production Operations: Volume III: Facility Piping and Pipeline Systems has a lot details on it. So when you read this book you can get a lot of help. The book was written by the very famous author. Mcdougal makes some research previous to write this book. That book very easy to read you will get the point easily after looking over this book.

Ann Goddard:

Surface Production Operations: Volume III: Facility Piping and Pipeline Systems can be one of your beginner books that are good idea. Many of us recommend that straight away because this publication has good vocabulary that can increase your knowledge in words, easy to understand, bit entertaining but nevertheless delivering the information. The author giving his/her effort that will put every word into pleasure arrangement in writing Surface Production Operations: Volume III: Facility Piping and Pipeline Systems yet doesn't forget the main place, giving the reader the hottest along with based confirm resource info that maybe you can be considered one of it. This great information may drawn you into new stage of crucial pondering.

Blake Darden:

Are you kind of hectic person, only have 10 or even 15 minute in your day to upgrading your mind ability or thinking skill also analytical thinking? Then you have problem with the book as compared to can satisfy your short period of time to read it because this all time you only find e-book that need more time to be go through. Surface Production Operations: Volume III: Facility Piping and Pipeline Systems can be your answer because it can be read by a person who have those short extra time problems.
