The Short Range Anti-Gravitational Force and the Hierarchichally Stratified Space-Time Geometry in 12 Dimensions Christina Anne Knight

The field of cosmology may be on the verge of a significant paradigm shift, as there is an increasing awareness that scientists have missed something fundamental as they carry on in their quest for a theory of everything and a theory that unites general relativity with quantum mechanics. Knight proposes a new theory suggesting that the space-time geometry possesses a complex hierarchical structure that comprises twelve dimensions—nine space dimensions and three time. Furthermore, this structure is divided into three strata, each of which has its own four-dimensional structure and stratum-specific fundamental forces and parameters—with variations in the gravitational constant G , the speed of light c , and the Planck constant. Through the pages of this work, this theory is further explained.

From reader reviews:

Barbara Spangler:

As people who live in the particular modest era should be up-date about what going on or info even knowledge to make them keep up with the era that is certainly always change and advance. Some of you maybe will update themselves by looking at books. It is a good choice for yourself but the problems coming to a person is you don't know what type you should start with. This The Short Range Anti-Gravitational Force and the Hierarchichally Stratified Space-Time Geometry in 12 Dimensions is our recommendation to cause you to keep up with the world. Why, because book serves what you want and need in this era.

Mark Feaster:

The reserve with title The Short Range Anti-Gravitational Force and the Hierarchichally Stratified Space-Time Geometry in 12 Dimensions has lot of information that you can discover it. You can get a lot of gain after read this book. This kind of book exist new information the information that exist in this guide represented the condition of the world right now. That is important to yo7u to know how the improvement of the world. That book will bring you within new era of the glowbal growth. You can read the e-book on your smart phone, so you can read that anywhere you want.

Tisha Betancourt:

People live in this new morning of lifestyle always attempt to and must have the extra time or they will get wide range of stress from both daily life and work. So , if we ask do people have time, we will say absolutely sure. People is human not a robot. Then we consult again, what kind of activity have you got when the spare time coming to anyone of course your answer will certainly unlimited right. Then do you try this one, reading guides. It can be your alternative within spending your spare time, typically the book you have read is The Short Range Anti-Gravitational Force and the Hierarchichally Stratified Space-Time Geometry in 12 Dimensions.

Michael Dennison:

This The Short Range Anti-Gravitational Force and the Hierarchichally Stratified Space-Time Geometry in 12 Dimensions is fresh way for you who has fascination to look for some information since it relief your hunger info. Getting deeper you into it getting knowledge more you know or else you who still having small amount of digest in reading this The Short Range Anti-Gravitational Force and the Hierarchichally Stratified Space-Time Geometry in 12 Dimensions can be the light food for yourself because the information inside this kind of book is easy to get by simply anyone. These books create itself in the form that is certainly reachable by anyone, yeah I mean in the e-book contact form. People who think that in reserve form make them feel sleepy even dizzy this e-book is the answer. So you cannot find any in reading a e-book especially this one. You can find what you are looking for. It should be here for a person. So , don't miss this! Just read this e-book kind for your better life and knowledge.
