A Biologist's Guide to Mathematical Modeling in Ecology and Evolution

Sarah P. Otto, Troy Day

A Biologist's Guide to Mathematical Modeling in Ecology and Evolution Sarah P. Otto, Troy Day

Thirty years ago, biologists could get by with a rudimentary grasp of mathematics and modeling. Not so today. In seeking to answer fundamental questions about how biological systems function and change over time, the modern biologist is as likely to rely on sophisticated mathematical and computer-based models as traditional fieldwork. In this book, Sarah Otto and Troy Day provide biology students with the tools necessary to both interpret models and to build their own.

The book starts at an elementary level of mathematical modeling, assuming that the reader has had high school mathematics and first-year calculus. Otto and Day then gradually build in depth and complexity, from classic models in ecology and evolution to more intricate class-structured and probabilistic models. The authors provide primers with instructive exercises to introduce readers to the more advanced subjects of linear algebra and probability theory. Through examples, they describe how models have been used to understand such topics as the spread of HIV, chaos, the age structure of a country, speciation, and extinction.

Ecologists and evolutionary biologists today need enough mathematical training to be able to assess the power and limits of biological models and to develop theories and models themselves. This innovative book will be an indispensable guide to the world of mathematical models for the next generation of biologists.

- A how-to guide for developing new mathematical models in biology
- Provides step-by-step recipes for constructing and analyzing models
- Interesting biological applications
- Explores classical models in ecology and evolution
- Questions at the end of every chapter
- Primers cover important mathematical topics
- Exercises with answers
- Appendixes summarize useful rules
- Labs and advanced material available

From reader reviews:

Gladys James:

Book is actually written, printed, or illustrated for everything. You can recognize everything you want by a reserve. Book has a different type. As we know that book is important point to bring us around the world. Alongside that you can your reading skill was fluently. A e-book A Biologist's Guide to Mathematical Modeling in Ecology and Evolution will make you to be smarter. You can feel far more confidence if you can know about anything. But some of you think which open or reading any book make you bored. It isn't make you fun. Why they are often thought like that? Have you searching for best book or suited book with you?

Evelyn Looney:

A lot of people always spent their particular free time to vacation or maybe go to the outside with them loved ones or their friend. Did you know? Many a lot of people spent they will free time just watching TV, or even playing video games all day long. If you wish to try to find a new activity this is look different you can read a book. It is really fun for you. If you enjoy the book which you read you can spent the entire day to reading a guide. The book A Biologist's Guide to Mathematical Modeling in Ecology and Evolution it is extremely good to read. There are a lot of people who recommended this book. These folks were enjoying reading this book. Should you did not have enough space bringing this book you can buy the e-book. You can m0ore easily to read this book from a smart phone. The price is not too expensive but this book offers high quality.

Michelle Gilbert:

This A Biologist's Guide to Mathematical Modeling in Ecology and Evolution is great book for you because the content that is certainly full of information for you who have always deal with world and also have to make decision every minute. This particular book reveal it info accurately using great organize word or we can declare no rambling sentences within it. So if you are read it hurriedly you can have whole facts in it. Doesn't mean it only provides you with straight forward sentences but tough core information with attractive delivering sentences. Having A Biologist's Guide to Mathematical Modeling in Ecology and Evolution in your hand like having the world in your arm, data in it is not ridiculous 1. We can say that no e-book that offer you world with ten or fifteen second right but this book already do that. So , this is certainly good reading book. Hey there Mr. and Mrs. busy do you still doubt that?

Edward Cooley:

E-book is one of source of information. We can add our know-how from it. Not only for students but additionally native or citizen will need book to know the change information of year to help year. As we know those ebooks have many advantages. Beside most of us add our knowledge, could also bring us to around the world. By book A Biologist's Guide to Mathematical Modeling in Ecology and Evolution we can get more advantage. Don't you to be creative people? To get creative person must love to read a book.

Merely choose the best book that suitable with your aim. Don't always be doubt to change your life with this book *A Biologist's Guide to Mathematical Modeling in Ecology and Evolution*. You can more pleasing than now.
